

INFO2180 - Project 1

Due Date: Friday, October 6, 2017

Based on your previous experience with the Codecademy Labs. Create a One Page Résumé using Hypertext Markup Language (HTML) and Cascading Stylesheets (CSS). Using a text editor such as SublimeText, Atom, VS Code, Vim or similar, create an HTML document called **index.html** and load your CSS styles from an external stylesheet called **styles.css**. The finished product should look similar to the screenshot below and include:

- Your name using an <h1> tag.
- A picture of yourself
- A phone number
- Your email address as a link
- A paragraph expressing your career objective
- Your Education, Skills, Work Experience, Hobbies and References with the vertical line separating the headings (on the left) and the content (on the right)
- Use CSS relative/absolute positioning to position your picture. (Try to use CSS to also tilt the image as seen in the screenshot).
- Use CSS floats to layout the Education, Skills, Work Experience, Hobbies and References sections.
- The finished product must work in Google Chrome, Mozilla Firefox and Microsoft Edge.

NOTE: You should NOT use HTML tables for the layout of this page. You will lose marks if you do so.

C'thulhu

Cell: 555-666-7777

Email: greatoldone@lovecraft.com

I am an outgoing and energetic (ask anybody) young professional, seeking a career that fits my professional skills, personality, and murderous tendencies. My squid-like head is a masterful problem solver and inspires fear in who gaze upon it. I can bring world domination to your organization.

Education

Withering Madness University - Planet Vhoorl

Major: Public Relations

Minor: Scale Tending

Skills

Office skills

Office and records management, database administration, event organization, customer support, travel coordination

Computer skills

Microsoft productivity software (Word, Excel, etc), Adobe Creative Suite, Windows

Experience

Doomsday Cult

Leader/Overlord - Baton Rouge, LA - 1926-2010

- Inspired and won highest peasant death competition among servants
- Helped coordinate managers to grow cult following
- Provided untimely deaths to all who opposed

Notes for Project 1

For this project you will be required to use a Version Control System (VCS) called Git (<https://git-scm.com/>). Create an account with Github (<https://github.com>) and create a repository that uses "Github Pages". For instructions on how to do this, I encourage you to follow the instructions on the Guide to Using Github pages (<https://www.thinkful.com/learn/a-guide-to-using-github-pages/>)

Here are some other links to help you get started with Git.

- Installing Git - <https://git-scm.com/book/en/v2/Getting-Started-Installing-Git>
- Try Git - <https://try.github.io/levels/1/challenges/1>
- Learn Git - <https://www.codecademy.com/learn/learn-git>
- Github Pages - <https://pages.github.com/>
- A Guide to Using Github Pages - <https://www.thinkful.com/learn/a-guide-to-using-github-pages/>
- Github Desktop GUI - <https://desktop.github.com/>

If you would rather use a desktop GUI client instead of the command line, you can use the Github Desktop GUI client (see link above).

Also if you would rather not install Git on your personal computer, you may also use Cloud9 (<https://c9.io/>), a cloud based integrated development environment. This online development environment already comes with Git installed.

Submission

Submit this project via OurVLE using the "Project 1 Submission" link. The following information must be submitted:

1. Your Github Pages URL e.g. <https://username.github.io> or <https://username.github.io/resume>
